Design 3D

Enfold3D

Did you know? Enfold3D was developed by Esko, utilizing technology from Studio Designer and Studio Toolkit for Boxes.

Photo3D

Studio

Part of Suite 12

Toolkit for Boxes

Designer

Toolkit for Flexibles

Visualizer

Toolkit for Labels

Store Visualizer

Toolkit for shrink sleeves

Both Strata and Esko offer a **whole suite of 3D design products** (although they are quite different in nature).

Find out why you should upgrade from Strata Enfold3D to Studio Toolkit for Boxes and Studio Designer. These 2 modules from Studio have all the functionality of Enfold 3D and more...

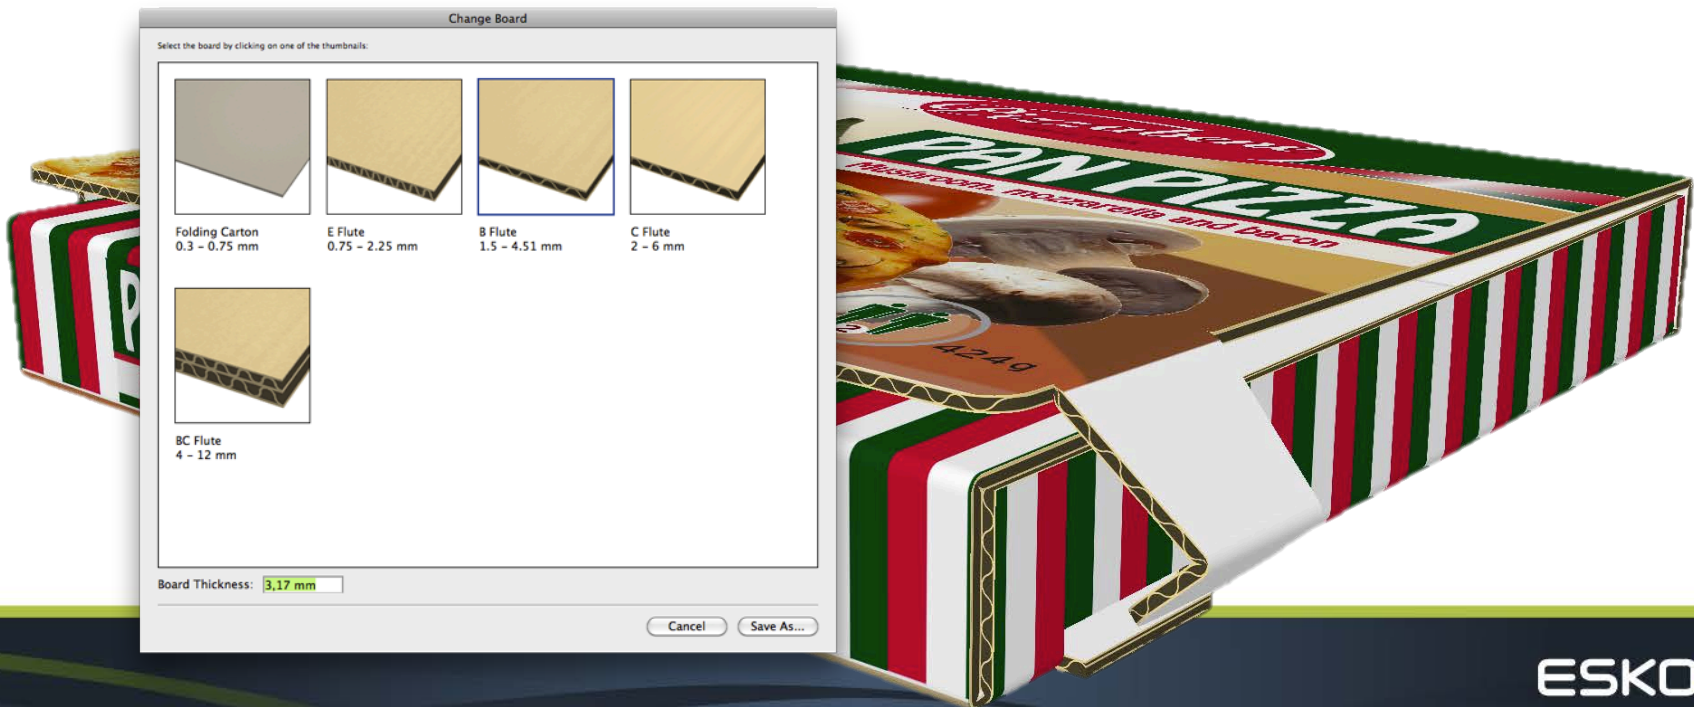

7 reasons to upgrade to Studio

1. Support for CS6 and 64 bit

Studio runs on Illustrator CS5 or CS6, Mac or PC, 32 or 64bit (whichever mode your version of Illustrator supports)

2. Board Thickness

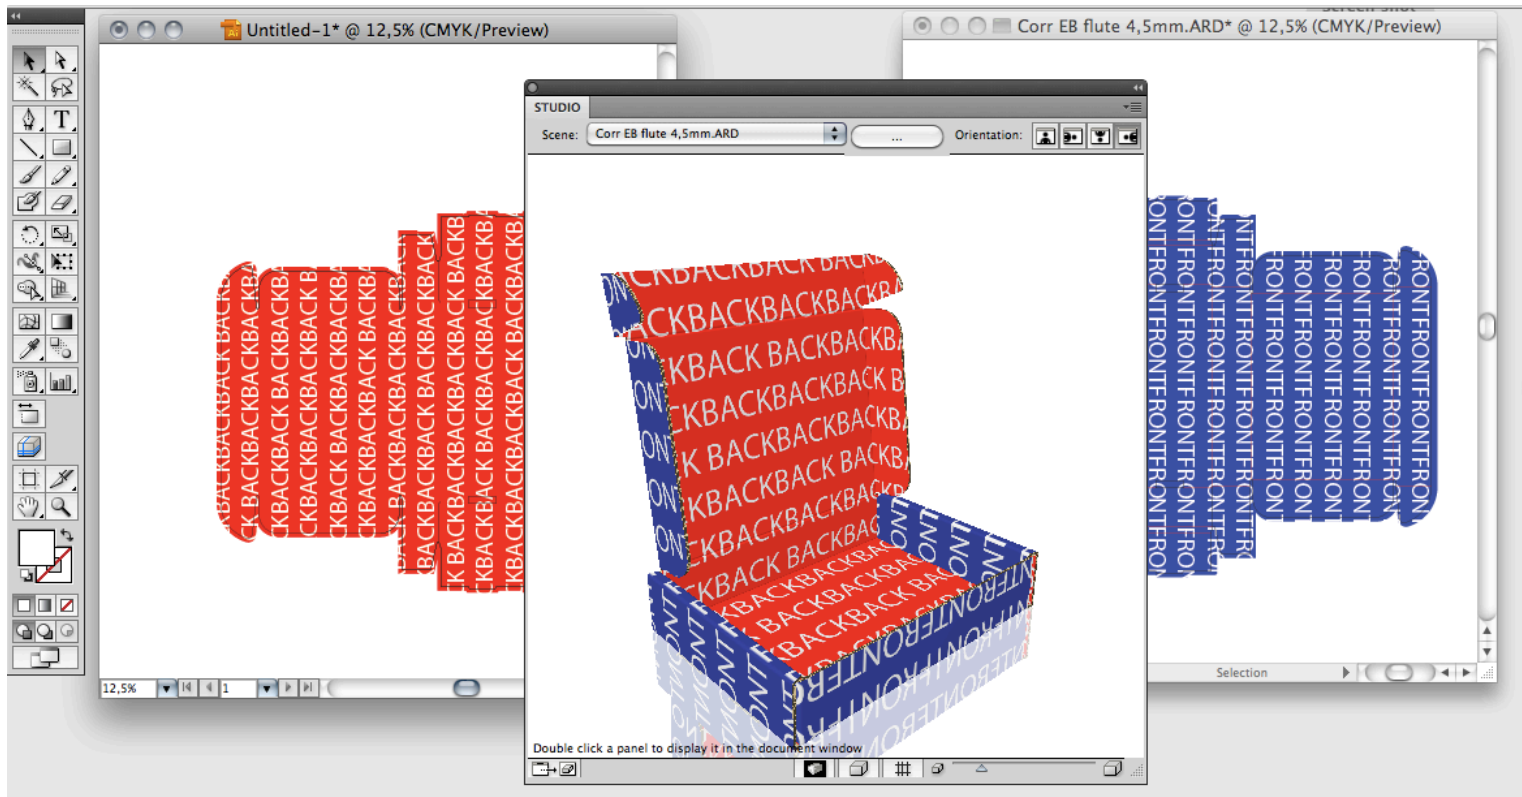

Choose board type and thickness and get a much more realistic 3D model.

7 reasons to upgrade to Studio

3. Double-sided Graphics

Design and visualize graphics for both the inside and the outside of your box.

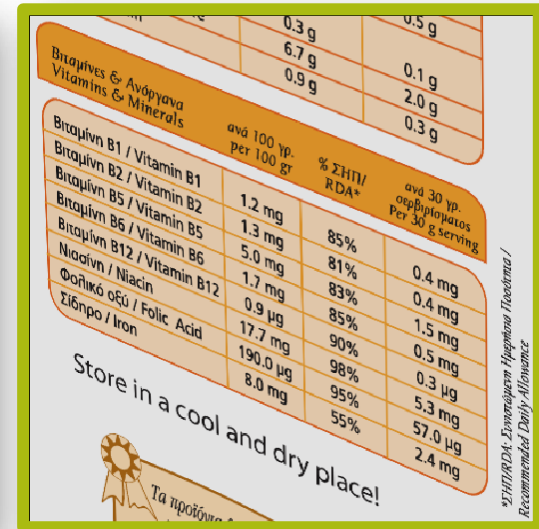

7 reasons to upgrade to Studio

4. More Export Possibilities

Like before you can export to U3D and TIFF. But also to 3D PDF and Collada files. On the output there is no more limitation on the artwork resolution.

Detail of a TIFF by Studio.

7 reasons to upgrade to Studio

- 5. Works with your Structural Design dept.**
Studio can read and write .ARD files, the native file format of Esko ArtiosCAD, the leading CAD software for boxes and displays.
- 6. Multi-part Designs**
Fold, compose and visualize boxes and displays that have more than one folded part. Design the artwork for each part and see it all come together in 3D.

- 7. Access to the Online Shapes Store**
Built into Studio Designer, is a link to an online store of more than 100 quality 3D packaging models, all ready to be used in Studio.

Benefits of upgrading now

- Illustrator CS6 Support - 32 and 64 bit modes
- Board thickness support - now more than just card stock
- Double sided - now design the outside and inside in one package
- Hi resolution output - no more fuzzy images and textures
- Packaging industry standard connections with output formats
- Multi-part designs - more than a one-piece-wonder
- Add Esko modules for labels, shrink sleeves, flexibles and more
- All at a special limited time upgrade price
